# ABOUT US

Six sense India's Strongest Brand across industries and sectors

- India's largest network of datacentre
- The company's mission is to create entrepreneur

**Mr. Salil Parekh**

Chief Executive Officer

# Company plans on expanding its business across other sectors such as financial services

**Mr. Salil Parekh**, as Chief Executive Officer and Managing Director, sets and evolves the strategic direction for the company and its portfolio of offerings, while nurturing a strong leadership team to drive its execution. **Salil** has nearly three decades of global experience in the IT services industry with a strong track record of driving digital transformation for enterprises, executing business turnarounds and managing successful acquisitions. He is a member of the National Council of the Confederation of Indian Industry (CII).

# Transform your business with SIX SENSE cloud

**SIX SENSE** is a leading data center micro sale and leaseback company started by MR. **Mr. Salil Parekh** with operations all over India. In some part of India, the company's products offer micro sale and leaseback which offers data properties to our partner and he buys the property on rent thereby generating rental income. The company plans to expand its business into financial services, education and other sectors.

**SIX SENSE'S** mission is to create entrepreneurs across India by providing market opportunities and training them with skills that they can use to start their own businesses.

# What is Data Center ?

[www.sixsense.com](http://www.sixsense.com)

# Transform your business with SIX SENSE cloud

Imagine we use mobile it has some memory like 16GB 32GB 128GB. Our mobile's data is saved into memory Similarly, the data of the bank is also saved somewhere, it is stored in the data centre.

Many times you have seen saying by the bank employee that the bank's server is down today and we think that it will be the problem of internet, but it is not so, it is a problem from the bank's data centre which is not working properly, it means there is a problem with the infrastructure of the bank's data centre.

To solve this problem, SIX SENSE has taken the responsibility that now company will work on this problem.

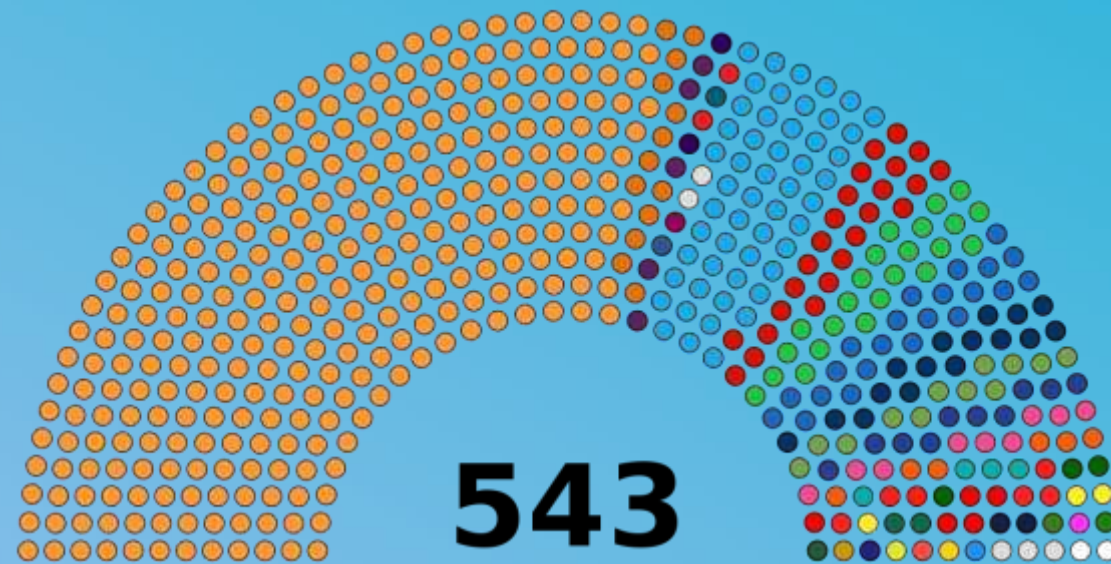

# India need 1 lac data centre, but unfortunately we have only 630 data centre

India need 1lac data centre, but unfortunately we have only 630 data centre. data centre cost very expensive, Its cost comes in crores 1server cost is 43 Lac. Our new data centre work progress in uttarakhand , Chandigarh, Delhi, Bangalore.

# Passed bill by Loksabha in 2015-2016

We all have MasterCard and the company is from America, which means America has Indian customer's data, which is not secure, fraud can also happen. For security new rule passed bill by loksabha in 2015-2016 loksabha agreement

with MasterCard that in **future** all Indians consumer's data store in India, it didn't happen.

Indian population is very high and data centre infrastructure expense too high and take long time so MasterCard's market going down. India company like Visa, RuPay has increased a lot because now all Indian consumer's data is stored in India only.

# We need Data Highways

Just like there are Roadways, Railways & Airways to which the country is connected. In the same way, we need Data Highways, over which our data is traveling easily.

## Supply gap between resources

If we see, what we talk about buffering, what we talk about video quality, where we talk about server timeout, then these things seem natural to us, then it would be the same. But this happens because of the supply gap between demand and resources.

# Why Choose Us?

## Fast Transaction

All requests and transactions are processed automatically and instantly. We are using one of the most sophisticated, encrypted and trusted Protection against every possible aspect

## Professional Team

Due to the financial capacity of clients, we make the most reliable and profitable ways of making a profit. Our Portfolio is diversified and taken care of by the most skilled crypto analyst and traders.
